# About us

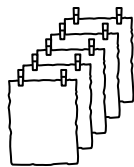

---

The company was established by paper industry engineer, László Vincze in 1985. The handmade papers are made by a 2000-year-old ancient Chinese tradition. The workshop includes graphic design, printing implementation and offers bookbinding works for the clients:

- *advertising professionals • artists*
- *paper restorers*
- *companies • organizations*
- *local governments • offices*
- *educational institutions • printing houses*
- *graphics studios • libraries*
- *archives • museums*
- *anyone and everyone*

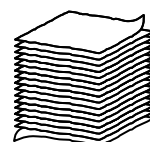

The center is located in Szentendre and the basic activity is hosted in Fedémes. The acid-free, high-quality, hand-dipped papers are made in Fedémes, in many different colors (white, beige, antique), sizes and thicknesses.

Vinczemill workshop has a very rich offer: watercolor, drawing and graphic reproduction papers, art prints, honorary diplomas, diplomas, stationery, business cards, catalogs, exclusive pictures and greeting cards, maps, bookbinding rarities, photo albums, occasional invitations, memory cards, envelopes, menus, menu cards, special wine labels, bookmarks, ex libris, presentation files, calendars, similar publications, guest books, bibliophile and material for chronicle books.

*„The creation of script carrier materials of art retains any other types of art.”*

—  
Virgil

# 01 | Types of paper

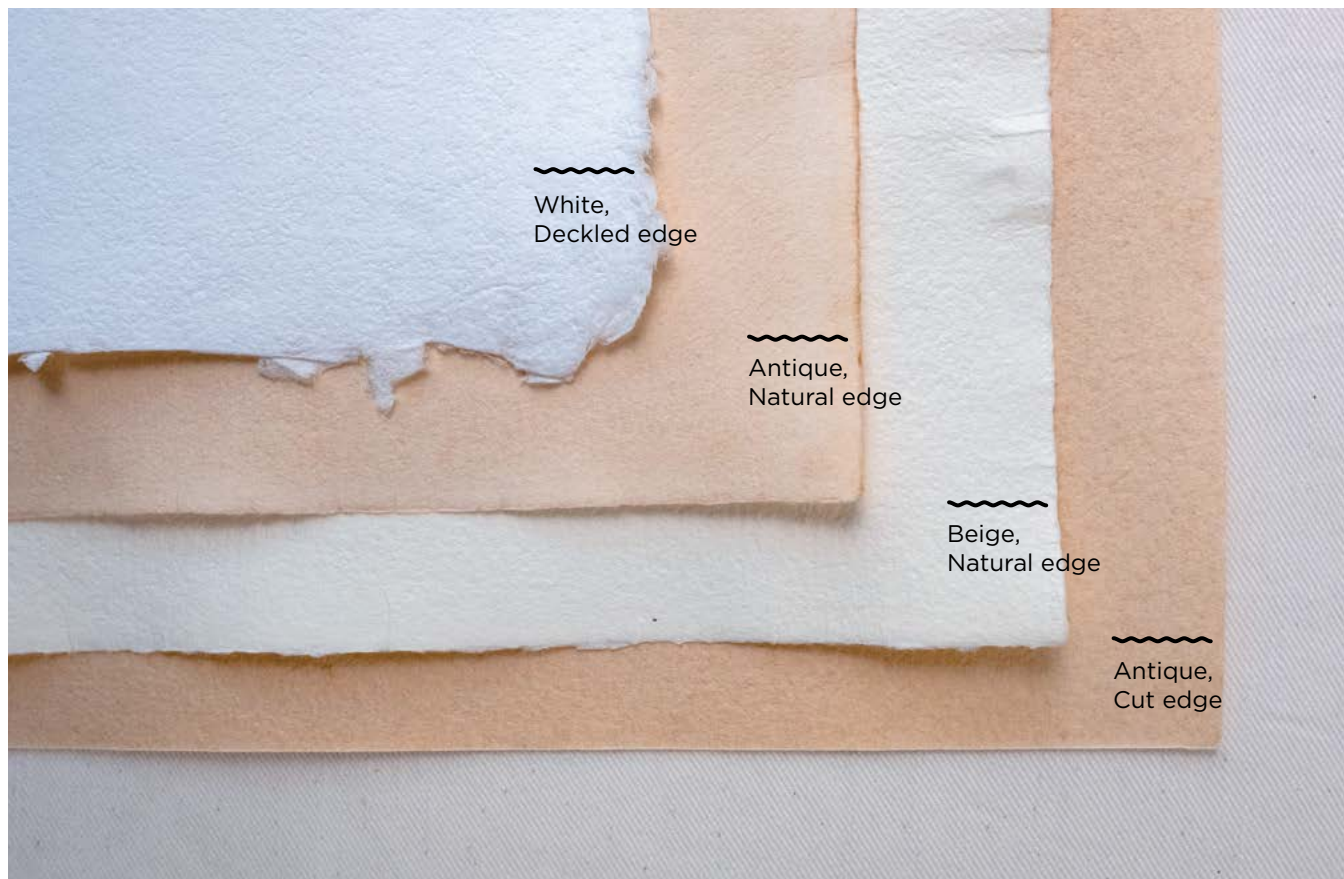

The acid-free, high-quality, hand-dipped paper is made by traditional technique in a paper mill.
